The Gift Of The Deer

HELEN HOOVER

The Gift of the Deer

A wilderness tale of a deer, his mate, their offspring, and two human friends

pen-and-ink drawings from life by ADRIAN HOOVER

DOWNLOAD EBOOK
Synopsis
One Christmas Eve an emaciated deer stumbled across the yard of Helen Hoover's remote cabin in northern Minnesota. Barely surviving the brutal winter, gaunt from starvation, blind in one eye from a hunting wound, he became the central character in Hoover's popular book The Gift of the Deer. Hoover and her husband Adrian named this deer Peter, nursed him back to health, and observed Peter and his growing clan for four years. The Gift of the Deer, first published in 1966, sold over 50,000 copies and is Hoover's best-selling book. This paperback edition is beautifully illustrated by Adrian Hoover, and readers young and old will delight in this touching story of two north woods families. --This text refers to the Paperback edition.

Customer Reviews
I hadn't read this book in a few years and when I saw it again on my shelf I remembered it was a great book to read in the summer. The story is a good one, esp. if you read it in partnership with Hoover's other book about her move to the woods, The Years of the Forest, and tells the story of how she and her husband moved to the wilds of Minnesota in middle-age and what (and who) they found there. The Gift of the Deer introduces us to Peter, Mama, Pretty, Friendly, and all the others who live in Hoover's "neighborhood" deep in the North Woods. Oh - and why is it great to read in the summer? Because her stories about the bone chilling cold of Minnesota winters are just right to balance the August heat and humidity!
Helen Hoover’s beautifully vivid prose makes this memoir read like a fantasy piece. I felt I was sharing the precious moments that she and her husband Ade spent with the wild whitetail deer family who visited them at their log cabin deep in the Minnesota woods. Helen’s richly descriptive style of writing draws you into their enchanting lifestyle, filled with peace, and the quiet mystery of virgin forests. The area around their cabin became a safe haven for a groundhog who became a regular houseguest, squirrels who nibbled graham crackers from Helen’s hands, chipmunks, ermine, owls, beautiful birds of all kinds, and even a bobcat and a lynx. This is more than just a story about wild animals. It is a tribute to Peter, the magnificent whitetail buck who taught them so much about the dignity and majesty of wild things, and enriched their lives with his noble and gentle ways. This book is a treasure of a journey into some of the most peaceful, delightful, and rewarding places that a nature lover can go without leaving their home. I hated to see it end.

The same Helen and Ade Hoover who introduced the reader to a place in the woods, now share their intimate relationships with a deer family in the remote Minnesota forest they live in. After leaving successful careers in Chicago, the Hoovers decided to fulfil a lifelong dream and move to a cabin on a lakeshore deep in the northwoods. From the first page the reader shares in the daily challenges and sheer magic of their life in the woods. When Peter a fully grown buck wanders into their clearing a relationship that would last for years begins. Over the years Peter, his mate Mama, and their offspring become integral parts of the Hoovers’ life. Helen Hoovers’ descriptions of the quiet snow filled forest and the glorious summers in the woods are breathtaking. The hen Bedelia and other forest animals are endearing, but Peter, Mama and their young are a gift indeed. Their trust in the Hoovers is complete and unusual. If you want to spend a New Years Eve in a cabin in the northwoods listening to a concert on the radio by the heat of an old oil stove, and wake up to visions of a winter wonderland read Gift of the Deer. It’s a book you’ll read again and again.

There isn’t much I can say about this book without spoiling the powerful ending. It’s about a starving buck who was saved by the Hoovers, and his family (and there’s no doubt in my mind that it was a family in every sense of the word). Mrs. Hoover’s prose is beautiful and moving, and you will be very surprised at just how human that Peter, Mama, and their fawns could be. Ade Hoover’s illustrations are also very good, and complement his wife’s prose perfectly. The book had me riveted from beginning to end, and I read it in two sittings.

Helen Hoover’s gentle wisdom and caring bring the reader into the timeless world of the wild. Her insights
teach us about the family life of deer and the struggles they face with prospective starvation, predators, the elements, and human ignorance. The book is as informative as it is moving and humbling.

WOW! I was so engrossed in this book! One of my all time favorites. We live near a National Forest and I can't wait to go exploring. I will never look at a deer or any wildlife, for that matter, without thinking of this authors experiences

This is one of my favorite books. It is sensitive, but not maudlin. It uses vivid pictoral imagery to show life in the northern Minnesota woods

I found this book last year and bought it for a freind who loved deer. I thumbed through it, thinking it would be dull. It turned out to be the most marvelous and heatwarming (and sometimes heartwrenching) book I've ever read. If you love wildlife, this is a book for you to read.
