Stars Of Success: Understanding How Children With Down Syndrome Learn

Synopsis

Stars of Success: Understanding How Children with Down Syndrome Learn is the only text available offering regular classroom and special educators, as well as parents, a succinct identification and discussion of the specific learning needs characteristic of children with Down syndrome and other intellectual disabilities. Approved by the NDSS, the text provides proven and effective instructional techniques for parents and professionals. An understanding of the child's mental processing ability and appropriate instructional design is an imperative prerequisite to the most successful presentation of academic materials. Stars of Success

Customer Reviews

This book is a mixture of basic advice and tools along with some academic information designed to help teachers instruct a Down Syndrome child most effectively. There are statements in it that will give you insight into Down Syndrome children and adults and how they think and what they perceive and what they go through. There is a good simple section on the physical characteristics of a DS child which consolidates a lot of what is written out there. The author talks about teaching a DS child around these physical limitations and it all makes sense. The subtitle for this book is "Understanding how children with Down Syndrome learn." This is an older book, but it is filled with good ideas for both a teacher and a parent who wants to maximize their efforts in teaching a DS child. It includes a bibliography and some websites that have tools. One of them Woodbine House is a publishing house for books that deal with disabilities and they have a nice selection for DS as well as other disabilities.

I have worked with a child with Down Syndrome for 6 years and didn't realize a lot of what I thought were his little quirks were actually very characteristic of children with Down Syndrome. I have learned a lot since I started reading this book. I would recommend it to anyone that will or is working with Down Syndrome students.

LOVE LOVE this book. We give it to our aide and teacher each year!

nice
