# The Smart Way To Play Roulette: IS USING A MODIFIED DOUBLE UP BETTING STRATEGY FOR THE HIGHER PAYOUT BETS

## Synopsis

Prior to ordering this booklet, now included in the "The Improved Martingale Betting System" book, also for \$0.99 cents, you are invited to watch a video at [youtu.be/FU7J2Gj8ww0](https://youtu.be/FU7J2Gj8ww0) that illustrates how this improvement works. Reviewed by one of Amazon's top reviewers, John WilliamSon 2100, his critiques can be found in the customer review and comments sections of my booklet titled "The Best of All Available Betting Systems" that can be found by searching for this title on the web or under the author's name Carlos Turver at Amazon.com. This booklet with another nine can be obtained with the March 16, 2015 edition of "The Improved Martingale Betting System".

When anyone of us walks into a casino, we are at the mercy of the house favored percentages. High minimum and low maximum table limits also work against those who use betting systems. The purpose of writing this booklet is to give roulette players a fighting chance of being able to leave a casino with the same amount of money that they came in with plus a reasonable profit! For those who want to play smart, safe and practical roulette, we suggest that the modified betting strategy for the one, two, three, four, six and twelve number propositions, described in the following "plan of attack", be seriously considered and implemented during your next casino visit. According to the experts who claim that it is mathematically impossible to beat roulette, they neglect to mention that it is theoretically possible to win perpetually when two conditions are met | If the bet ceiling is removed and if a player has unlimited funds, the casino will always lose in the short and in the long run! As a casino will seldom, if ever, remove their maximum bet limit, it is essential to use a betting strategy that works within those limitations. Such a strategy is offered in this booklet |

## Book Information

## Customer Reviews

I am continually amazed by these roulette book writers. Not only the egregious lack of understanding concerning their own subject matter, but the shockingly poor understanding of basic sentence structure, communicative writing, or even the English language as a whole. Again I wasted time reading a 3rd graders version of what he heard somewhere might be profitable. Poor English and even poorer writing aside, nothing relayed in this bit of gobbledegook actually works. Not even a little bit.
