## Customer Reviews

This is an interesting book. There is a lot of information in it. It would be a great book to purchase if you are planning on studying law. Since I am not a law student, I am glad that I rented the book, as I probably won't use it again after this semester is over.

Easy to read and get through. The examples make sense and the case studies help for the tests. I used it for a Straighterline exemption course but it could be used to study for CLEP it's that versatile.

The book itself was a little beat up and looked like it went through hell and back, BUT no pages were missing, which is a huge plus. I also loved that there were side notes throughout the chapters. Definitely helped a lot!

I hate reading textbooks as much as the next college guy, but this book is good enough to make it somewhat bearable. The cases help explain things and it is written in plain English which makes it easy to understand. Great value considering the new edition is over \$100

I like this textbook a lot even though it's a textbook. It uses a lot of sample trials to further explain and clarify points of interest. My one dislike about the book is the treatment of vocabulary. There are some words that are in bold in the text, but they are not included in the glossary. Some words aren't defined directly in the text even though they are in bold, but they are included in the glossary; and

some words that seem very important are only in italics. However, overall I think it does a really good job of making this information as clear and easy to understand as possible and I really like the example cases. The questions at the end of the chapters are also very useful and can help review the main points of the chapter.

This book was over \$400 at my campus bookstore. This is a great deal for a new copy. It may be an older version, but it really has all anyone needs to learn the basics of business law.

The book comes in with bad condition it is all wet I have to dry the book for awhile it was not useful for me I wasted 30 dollars for nothing

Bought the book, then found out that the professor taught and tested from the lectures. Oh well, it makes me look smart on my bookshelf.
