Customer Reviews

- I have had this on the shelf for many years and until now only did a cursory flip through. Finally, in an attempt to declutter, I could not relinquish it without taking a closer look. Reading it cover to cover, I was pleased and surprised to find how useful and informative this book is. This is a concise

and easy to read work written by a NY dermatologist who offers interesting cases for reference, product recommendations, and explanations for ceasing generally accepted and practiced routines. (The edition I have is 1999, so there are hundreds more and different items available now. For drugstore recs I just took note of the brands and category). While this may now be an oldie, as a self-professed hoarder of cosmetics and a woman who has devoted years and much effort to taking care of my appearance (I own many books in the makeup/beauty genre, subscribe to Allure, New Beauty, etc) I found a lot of useful information here, i.e., I didn't know that my lazy day without a shower was good for my skin.) As someone who does a lot of my own beauty care (manicures/pedicures, haircut and color, a regimen of facial masks between professional facials,) I especially enjoyed Chapter 3, "At Home Care for Skin, Hair, and Nails" which included a brief anatomical overview. Chapter 4, "Your Skin Profile: Analyzing the "Why" of Your Skin", included an alternative to the standard categorization of skin types into dry, oily, and combination via self-analysis using a quick questionnaire to determine your skin profile of which there were 5: hormonally reactive, stress reactive, environmentally sensitive, overexposed, and hearty.
